

FRONT END WEB DEVELOPER - NORTH WEST - to £27k + EXCELLENT BENEFITS

Our client, based just outside of Manchester, are seeking a Front End Web developer for their fast growing Digital Marketing Agency, offering a fun, vibrant and enthusiastic working environment. With a 30 strong team that includes Graphic Designers, Web Developers, SEO Specialists and Sales Staff, they are continuing to expand and are looking for good, highly motivated people to help with these ambitious growth plans.

They are currently looking for a Front End Web Developer with HTML, CSS, JQuery, Javascript, AJAX, & Bootstrap application experience, with a minimum of 2 years commercial experience.

The Talented Development Team work on a variety of projects, so the work is always stimulating and no two days are the same. The role is for a specialist front-end web developer that will be able to work in the space between web designers and back end developers and so a creative eye for web design & development is essential. An understanding of responsive design & SEO best practices is required. You will have excellent communication skills with both colleagues and clients alike.

The front-end developer will be able to translate creative designs into HTML/CSS/Javascript. Key to your success will be the ability to work closely with both the web designers and the application developers in a highly agile environment, creating a seamless flow of work through the development cycle.

The agency is a real success story and an employer of choice, offering a fantastic working environment and excellent staff development programmes.

If this appeals and you want to be part of this vibrant and successful agency, don't miss out - submit your CV for immediate consideration.
